Kp.org : Website Feedback

I have submitted this text 3 times and the survey site is not providing a confirmation of receipt. I am also submitting this text through my Primary Care Doctor at KP.org online patient portal as well as printing this text to be hand delivered to wherever appropriate to get a confirmation of receipt ( if a lawyer must be used to obtain a proper discussion regarding these concerns, so be it.

What is written here 8s the truth, the whole truth, and nothing but the truth.

And I wonder why no one in my family can represent the truth when this is the exact truth?

[@Veronica\[👩\] Ann\[👩\] Warnick\[👩\] Driskill\[👩\] Mother\[👩\]](#)

For my very own mother threaten to kill me rather that demonstrating support to correct this.

And my two cousins would not help,

[@Debra Talbot\[👩\] Kick : Health Care Nurse\[👩\]](#)

And

[@John Michael Talbot\[👩\] : Retired FBI \[👩\] Agent](#)

At her direction I am sure. How involved my family is to treating me so poorly means I must name them as defendants in this case, if lawyers are needed to terminate these conditions permanently.

Mama, you have allowed these conditions to remain hidden without truly helping and what you have done is unforgivable.

I never want to talk to you or hear a single word from you until these matters are properly addressed and a resolve is properly sought to save my life.

My name is James Martin Driskill and I hold internet domain ownership of several internet domains that serve as an online journal space holding surface web indexing. There is absolutely nothing on my web domains that are unsafe to browse and content is cleared by such safe site scans. There is nothing illegal at all or out of practice 9f "Professional" communication standards.

How this applies to kp? And on consent how does kp and my experiences with a different medical provider differ. I suggest we (together) move forward in some kind of reconciliation process to acknowledge the truthfulness of my online journal space that has existed since 2005 that as of 2023, proves beyond a reasonable doubt that I am a personal victim of circumstances that has occurred that can be best described as being blackballed against medical care in both Mental Health and more dire in HIV care that has resulted into a catastrophic failure in HIV care which includes the prevailing documented evidence at fault with the complacency (and ghosting communications) of healthcare under Humana.

This is not a joke. The matters of this conflict that has infected by ability to maintain adequate healthcare against the article 25 of the International Declaration of Human rights is strongly observed and documented to be incorporated into a controversial but researched on the NIH.gov labeled current understandings of realism of what has happened to me is real and that unreality on maintaining to be blurred and barred from a resolution is unrealistic to maintain. Such maintaining status quo is fatal to hold against me as each physician in my care seems to think they have the justification to cut care push me to some other medical care provider or to attempt to deceive me in an obvious malpractice statement that a downgrade to collapse 8n HIV treatment being withheld has led to a substantial (irreparable harm) within the most recent months of blood levels of the CD4/CD8 Ratio collapsing to a value of 0.25 which is 75 points down from what 8s typically viewed as 1.0 normal.

My current assigned HIV doctor assigned under the Humana systematic approach to intentional malpractice experiences to blackball me from care tells me that in HIV care, the CD4/CD8 Ratio is no longer used as an indicator, a complete deceiving lie.

This doctor has a name, a NPI record, and @Disqus commenting tool (moderator reviewed) at

<https://npino.com/npi/1851498729-sudhakar-v-mallela/>

Have I got your attention? A question such as posed like this deserves an administrative response, don't you think and agree?

Cc this text (my newly assigned KP Primary Doctor - first session between her and I was yesterday)

To begin with my history documented, which must be up forwarded into "Medical History" into my medical record at kp.org begins at these valid information society internet domain links.

Fyi, these domains exist as of 2005 and is unquestionably when I began journalizing the effects of being a Targeted Individual of Gangstalking. (Use Google Search (Nih.gov Gangstalking) to find direct [nih.gov](https://www.nih.gov) links to 3 separate research findings on this subject. Apparently someone or something has hacked these documents from showing a direct [nih.gov](https://www.nih.gov) search noted as being powered by Bing!

Well, let's say that my life has been severely and detrimentally effected by this provable conspiracy.

Believe me, there are 3 research papers and their findings published at the National Institutes of Health.

Starting April 2020:

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7178134/>

Int J Environ Res Public Health. 2020 Apr; 17(7): 2506. Published online 2020 Apr 6. doi: 10.3390/ijerph17072506

The Phenomenology of Group Stalking ('Gang-Stalking'): A Content Analysis of Subjective Experiences  
Lorraine Sheridan,1,\* David V. James,2 and Jayden Roth1  
Author information Article notes Copyright and License information.

Can I leave it up to you to find the other two research findings that specifically has notices or advice to clinicians?

It would be nice to have a response and a discussion about these circumstances.

But for now, let me share the URLs of several locations and presentations made in view of my medical care mistreatment upon my Humana Medical Interface and what should be done to reconcile this entire mess before I find some kind 9d problem at Kaiser Permanente in the continued dysfunction experienced which this text written is goal oriented to avoid. I would rather live that die thank you. This is not a laughing joke.

Why Would An Entire Civil Society Ignore or worse Block Me For No Reason Across ALL Social Media?

An Individual Reaching-Out With His Attempt To Get Resolve For #HIVUntreatable ?

This is a RECORD of TRANSMISSION of a FAX that WAS CONFIRMED -- but the action by the DOCTOR does not RELATE processing. The fax is about the initiation of PATIENT-CENTERED communications. It does not make any sense that I can not assert these needs into my care with my HIV Disease. This matter must be put upward into a counsel of higher authority -- The Federal Bureau of Investigation - and joined to be UNITED FORCE to call downward reprimands upon the wrong way thinking and insane blocking PATIENT-CENTERED REQUIRED BY LAW to BE PRESENT and ACCOUNTED FOR -- ENFORCED LAW MEDICAL CARE INTERFACES!

So far, a story of great tragedy!

These matters must be acknowledged and truthfully reconciled.

I should be welcomed back into a proper reconciled relationship with the Library when I am suspended and it remains unresolved: they claim I used threats and said I was a terrorist.

A complete fabrication of deception to support this conspiracy on behalf of the San Bernardino Police.

Well, San Bernardino PD doesn't have authority over the CIA or FBI. You're being investigated, and provoked. Sometimes, people do things that get them into a little bit of trouble, but then there's much more powerful people who want you to get yourself in much more trouble, so they can really punish you, or get rid of you, no questions asked. The media gets a scare story out of it, and the status quo is maintained another day.

All officials at high enough levels are aware of this, including police departments, save the low level officers who just take their orders, and know enough to only deliver vague information directly from superiors. Basically, you're not exposing this to anyone who can immediately do anything about it, and even if they could, they probably aren't interested in doing so. Unfortunately, it's just a bunch of other powerless people in the exact same boat listening, including me.

I know how much it sucks, and I'm sorry this is our lives, but don't let them take your dignity, or your sanity, and forgive them. Think of being so scared of other people that you need to tease them like a middle school child, as you hide behind conspiracy level surveillance systems, and billions of dollars in weapons and infrastructure, probably just because someone typed the wrong thing into their google search bar.

Again, I'm really sorry, I don't really know what to do either but keep getting through days, and enjoying what I can as a recluse.

Investigated by weirdos!! They can try to get rid of me because that's what they are going to have to do. I'm not backing down because I'm not scared. These are perverts and weirdo's

They're perverts and weirdos who are almost always either indebted to, or employed by very powerful people. You should not back down, I wouldn't suggest that, but don't think for a second that any official agency has any interest in helping us, they don't.

The best way to combat gangstalking is to act as though it doesn't affect you. Let it be annoying, let it be a nuisance, but don't let it be the end of the world. The second you get too big for your britches, they have you exactly where they want you, checkmate.

To be honest, I'm mostly living out of spite at this point, and that's enough for me to know that it's all I need to do to bother them, and the only way they can make my life worse, or get rid of me is by trying to get me to do it for them. I won't do that, though, I'll keep my cool, and collect my benefits, and maybe one day they can find a way to cope with that.

I am also a victim of San Bernardino Police & Sheriff Gang Stalking. I had to turn my Twitter into an evidence record with every encounter. I began filming them and posting on Social Media. Turns out the Veterans Administration works with local Law Enforcement to "monitor" Veterans. Since i held a TS in the military and the Air Force disappeared me for 30 years none of the LEO can understand my Military Service. So as i am posting their faces, they are getting reassigned because they have been Outed. It is only in 2021 that I discovered LEO is actually paid to conduct this monitoring. And like every group of Men with sensitive information they start gossiping shit talking etc, until the whole damn force wants a bite of the pie. Now you have flipping meter maids following you home out of morbid curiosity.

All police departments allow this nonsensical practice. Imagine you spot a sketchy person and upon making others aware of said person they make You aware that they are part of an investigation. My advice is try to get on the other side of things, like for example instead of being followed you are being escorted... Instead of being watched you are being admired.

What is true.

I do not lie, cheat, or steal my way through life. I may not have had this philosophy for all of my life, but for more than half of my entire adult life, I really mean what I say and I do what I say I intend to do.

What I know, I know and when I don't know, I say so.

As of this day and yesterday, I have embarked on the community affairs that we all can see a need to actually receive my communications and journalized presentations by linking to my web domains when links are presented, as though those in community can be and shall be professional in all of these regards.

Therefore, if you can see this truth. I have registered with my new medical provider of [kp.org](http://kp.org) and submitted this communication to my primary care doctor.

The PDF is attached to this email is showing here as attached into my file. Therefore begins a new step to obtain trustworthy and truthful HIV care as it should be

Message body:

I chose the option 'speciality care' in that my text here is a follow-up to a discussion between me and Doctor Chen regarding the overall subject that begins our trustful exchange. This text has been submitted to the general website feedback survey and this communication text has been placed into a multi-addressee To: email that includes personal family and specific contacts within the San Bernardino County ( [sbcounty.gov](http://sbcounty.gov) ) specifically [@hhs.sbcounty.gov](mailto:@hhs.sbcounty.gov), [dbh.sbcounty.gov](mailto:dbh.sbcounty.gov) with these contacts being used to attempt to secure an adequate address upon the community of these special concerns and considerations that so far not one person will professionally respond to me of these truths. I consider this communications to be a part of 'medical history' to be incorporated into my medical file. There is a 1000 character limit, so I must break my text here into several parts.

( I would call this a specialty understanding exception to care )

I am using pdf attachment for email.

Hello, James. I am not showing an email received to our inbox regarding your experience with Humana Healthcare. You can email us at [KP-Member-Services@kp.org](mailto:KP-Member-Services@kp.org) if you need assistance. ^Chad

---

So of course I am now redirecting this email to this new email address along with everyone in the address header.

Noteworthy is this person at [sbcounty.gov](http://sbcounty.gov) in this. My mother and I confronted the situation. About about being unjustly being terminated and handling of my social services interface with Foothill Aids Project which remains unaddressed and broken giving me no access to case management as a person with HIV in my hometown since this all came crashing forward with the death of my former HIV Doctor who would not treat my case after I attempted to bring these matters forward.

Smiles?

No! Nothing funny here.

Doctor Eric Tomoni Sigeno Died on April 10th 2020, a period of less than 2 weeks after I violated the restraining order he sought and placed against me.

I violated the restraining order by faxing The San Bernardino Police Department, Foothill Aids Project, and his office at Borrego Health.

I was not aware at the time of Doctor Loraine Sheridan's paper issued at the National Institutes of Health in April 6th. A very serious deductive reasoned statement of conclusion of the cause of death of Doctor Shigeno I am making here.

Subsequently, there are two additional research papers posted at the national institutes of health on this subject since then.

My initial interaction with Doctor Shigeno in March of 2019 at the offices of Borrego Health included Twitter interface with CDC HIV Director Doctor Mermin.

At the time, @BorregoHealth had a Twitter interface. Not to mention that Doctor Shigeno was a former employee of Desert AIDS Project ( now known as DAP Health ).

In view of everything I know happening here I suggest something much less smiling involved to the death and introspective of events that are true and remain suspect to not be able to bring forward ( but must ).

DoctOr Shigeno died of a suicide not of a stroke as so reported in the news. Died April 10th 2020, 4 days after the NIH.gov paper of Doctor Sheridan but more drastic to outcomes, the Federal Bureau of Investigation Raided the offices of Borrego Health in October of 2020.

With the death of Doctor Shigeno, and matters that can not be brought forward, his prior employment at Desert Aids Project and DAP Health now has taken over operations of Borrego Health, something to smile about really?

Really people.

Seriously I die from not being able to speak this truth somehow and all of you get away with murder if this is not immediately corrected.

What is true.

I do not lie, cheat, or steal my way through life. I may not have had this philosophy for all of my life, but for more than half of my entire adult life, I really mean what I say and I do what I say I intend to do.

What I know, I know and when I don't know, I say so.

As of this day and yesterday, I have embarked on the community affairs that we all can see a need to actually receive my communications and journalized presentations by linking to my web domains when links are presented, as though those in community can be and shall be professional in all of these regards.

Therefore, if you can see this truth. I have registered with my new medical provider of [kp.org](http://kp.org) and submitted this communication to my primary care doctor.

The PDF is attached to this email is showing here as attached into my file. Therefore begins a new step to obtain trustworthy and truthful HIV care as it should be

Message body:

I chose the option 'speciality care' in that my text here is a follow-up to a discussion between me and Doctor Chen regarding the overall subject that begins our trustful exchange. This text has been submitted to the general website feedback survey and this communication text has been placed into a multi-addressee To: email that includes personal family and specific contacts within the San Bernardino County ( [sbcounty.gov](http://sbcounty.gov) ) specifically [@hhs.sbcounty.gov](mailto:@hhs.sbcounty.gov), [dbh.sbcounty.gov](mailto:dbh.sbcounty.gov) with these contacts being used to attempt to secure an adequate address upon the community of these special concerns and considerations that so far not one person will professionally respond to me of these truths. I consider this communications to be a part of 'medical history' to be incorporated into my medical file. There is a 1000 character limit, so I must break my text here into several parts.

( I would call this a specialty understanding  
exception to care )

I am using pdf attachment for email.

Your attempting to parse this matter in-between two healthcare systems and disassociate yourself from the other.

That does not work in this case for the reasons I have responded to you in direct FB messenger.

WE DEALING WITH SOMETHING MUCH LARGER THAN PARSING THE MESS OUT TO Individualized EXPERIENCES WITH HEATHCARE SYSTEMS AND I PRECOGNITIVE PREDICTED THIS WOULD BE THE ATTEMPT BY KAISER PERMANENTE TO

NOT RECEIVE THIS MATTER APPROPRIATELY.

Do I get a way to engage this subject properly?

Chad - I appreciate your involvement in this matter.

You left the messenger content with advice to seek consult with my primary doctor.

I have additional response content that so far has been left after your response as unread.

As I mentioned, I am taking this email that has been given an opinion of being interfered with ( whether intentional, accidentally, or otherwise), these matters are technically not beyond both of our controls to correct.

This matter and these technology involved processes are indeed an outcome so far not ok. Far far from being ok.

I am forwarding the addendum comments into this email. I will be converting this email here to a PDF and submitting the interm unresolved matter to my Primary Care Doctor Per Your Suggestion.

Thank You.

You may have to contact your upper level supervisors for advice on how to proceed. I welcome such interface. Thank you

I need a licenced social worker / case manager to proceed.

Once again Chad, the interface that I am using here of Facebook Messenger is being used to create a message collaboration that can be pulled together by a feature on Facebook DATA DOWNLOAD. In that effort to fix this, my entire history of Facebook messenger has been placed online as an archive.

The message in preview is subsequent review details by Google Search Console Interface.

<http://facebook-inthemindway.realityaudit.website/>

( Preview Snapchat Attached )

You can browse my entire messenger history

[http://facebook-inthemindway.realityaudit.website/messages/your\\_messages.html](http://facebook-inthemindway.realityaudit.website/messages/your_messages.html)

( Preview Snapshot Attached )

You will surprisingly find this archive very instrumental in proving a conspiracy - when viewing the multitude of HIV/AIDS organizations and agencies that are listed as well and the numerous number of deleted accounts noting "Facebook User" that goes to why anyone or any agency chooses to remove ( or reset ) their digital footprints. This is not a joke

This is Humana History Archive of this very tool we are engaged here today Chad.

[http://facebook-inthemindway.realityaudit.website/messages/inbox/humana\\_gllhkdszqx/message\\_1.html](http://facebook-inthemindway.realityaudit.website/messages/inbox/humana_gllhkdszqx/message_1.html)

Sorry

This is called "An Inconvenient Truth"

Are you going to ghost 🙄 me here tooa

Too?

note: at this point, Chad begins to type. Whether or not he has read or understood the content really from above.

I followed with a quick response before he had a chance to finish his text

You may have to contact your upper level supervisors for advice on how to proceed. I welcome such interface. Thank you.

His response ( and seen by indicator remains - Preview Screenshot Attached ).

Since Member Services is not medically trained nor able to add anything to your medical records for future care. I would suggest discussing this more with your primary care doctor to develop a good report and treatment plan. ^Chad

---( content not yet received on FB messenger )---

I have that suggestion already in my initiation to these matters. As such, my next primary care appointment is in four weeks and I will cross share your advice via PDF of mentioned email of today into her care on the patient portal which indeed does place this matter into my file.

Might I suggest - for a third time - because the primary doctor is going to have the same condition of consult in these regards

.

You may have to contact your upper level supervisors for advice on how to proceed. I welcome such interface..

Thank you.

Since there is a mention of involvement of the FBI in the case of Borrego Health, this matter might indeed need such a higher degree of a process. I am predicting this outcome successful - to avoid a lawyer involved court process that does not have an outcome of any future human deaths, including my own by an outcome of being continued targeted and blackballed from care and improper treatments of HIV/ AIDS disease.

This has destroyed my family.

( Image attachment of secure mail .html access on my Android )

This image was previously shared in the conversation with his response...

Since the email I sent is encrypted, it would be best to open from a laptop of a computer. Sometimes the mobile device (IOA or android) does not work well with encrypted messages.

( Prior chat snippet screen also attached - I must keep this in a PDF format limited - end of snapshots )

I continue with my so far unread addendum comments from Facebook messenger that was quoted at :

This has destroyed my family.

Snapshot of dysfunction of secure mail .html

And btw the fix for the secured mail .html attachment so that it should operate correctly on mobile device formats is to give additional space ( perhaps credits or other blank space ) so that the page can scroll below the boundary that is restricting the user operation on this side..

Note: the page is showing without a scroll bar on the right.

Unable to view or access the validation code field or access the submit button below this.

Anyone would know how to correct this issue and subsequent to that, I should not be forced to a process in this manner ( accidental or on purpose) that interferes with Article 19 of the Universal Declaration of Human Rights written in the late 1940s.

Without Interference.  
Through Any Media  
Regardless of Frontiers ( technology or otherwise )

You should have that fixed.

Article 19

Article 25 is being challenged that has been continuously violated in my healthcare experiences.

Article 25 of the Universal Declaration of Human Rights covers a wide range of rights, including those to adequate food, water, sanitation, clothing, housing and medical care, as well as social protection covering situations beyond one's control, such as disability, widowhood, unemployment and old age.

Seriously I should have absolutely no interference here with Kaiser Permanente
